

HOW TO BUY AGRICOINS?

To purchase AGRICOINS, transfer the necessary amount of ETH to the address of the smart contract from your own wallet (not from the wallet on any exchange).

HOW TO CREATE THE OWN WALLET?

To store Ethereum you need a crypto-currency purse, which you can install on your device. From local wallets to participate in the ICO, it is advisable to choose light wallets that do not load the entire block to the device (for example Jaxx / Exodus).

After downloading and installing it will be necessary to select the Ethereum crypto currency (ticker - ETH) and find out your address (for example 0xb794F5eA0ba39494cE839613fffBA74279579268) - this address will be used when purchasing the ether.

HOW TO PURCHASE ETHEREUM?

It is optimal to buy the ether through exchangers that accept more payment methods (Visa / MasterCard, QIWI, Yandex.Money, etc.). The list of suitable exchangers can be found here: <https://www.bestchange.ru/>.

Attention! When you choose an exchanger, you should not rely solely on the profitability of the exchange rate: for beginners, the reliability of the exchanger is much more important, so you should study its reputation (for example, read user feedback about it).

HOW TO PARTICIPATE IN ICO?

After you bought Ethereum and saw in your wallet a message about the replenishment of the balance, you will be able to participate in ICO Agrivita.

AND WHAT THEN?

After the transaction is completed, AGRICOINS will automatically be transferred to your wallet.

Congratulations! You became the lucky owner of AGRICOINS!

ADVICE:

To make sure the smart contract works and you will immediately get AGRICOINS, you can do a minimum transaction for a start.
